## NT-S5E3E

Single-Crystalline Silicon  
Photovoltaic Module  
with 185W Maximum Power

### GENERAL DESCRIPTION

SHARP's NT-S5E3E photovoltaic module is designed for large electrical power requirements. Based on the technology of crystal silicon solar cells cultivated for over 35 years, this module has superb durability to withstand rigorous operating conditions and is suitable for grid connected systems.

### FEATURES

- 1** High-power module (185W) using 125mm square single-crystal silicon solar cells with 14.2% module conversion efficiency.
- 2** Photovoltaic module with bypass diode minimizes the power drop caused by shade.  
Textured cell surface to reduce the reflection of sunlight and BSF (Back Surface Field) structure to improve cell conversion efficiency: 17.1%.
- 3** Using white tempered glass, EVA resin, and a weatherproof film along with an aluminum frame for extended outdoor use
- 4** DC 24V system and high-voltage output for grid-connected system
- 5** Output terminal: Lead wire with waterproof connector
